About Me

Introduction

Experienced IT Engineer with comprehensive expertise across all stages of the project lifecycle, including requirement gathering, effort estimation, milestone planning, task creation and assignment, development, testing, deployment, and client demonstrations. Proven ability to deliver high-quality solutions while ensuring seamless project execution and client satisfaction.

Skills

- Expertise in understanding client requirements and delivering tailored solutions to address pain points effectively.
- Skilled in providing near-accurate estimates for features and requirements.
- Proficient in designing high-level architecture for robust and scalable solutions.
- Experienced in task planning and resource management to ensure timely project delivery.
- Developed and implemented SOPs to streamline workflows and enhance operational efficiency.
- Guided teams in adhering to best practices, driving quality and consistency across deliverables.
- Proactively introduce automation to optimize processes and reduce time spent on repetitive tasks.

Technical

Below are the technologies that I prefer to work on (but not limited to)

- Technologies: NodeJS, ReactJS, NextJS, GraphQL, Socket.io
- Languages: Typescript, Javascript
- Frameworks: ExpressJS, Serverless, MUI, shadcn
- Databases: MongoDB, PostgreSQL, MySQL
- Tools: VS Code, PostMan, Github, draw.io, dbdiagram.io
- Version Control System: Git
- CI/CD: Github Actions, Bitbucket Pipelines
- Amazon AWS Services: EC2, Lambda, S3, SQS, SES, Cloudfront, ECS, ELB
- Operating Systems (in preferred order): macOS, Linux, Windows

Portfolio

SFM - Link

Smart Facility Labs is a provider of advanced, cloud-based solutions for energy, property, and asset management in commercial and residential facilities, enabling operational efficiency and real-time insights through technology integration. The platform supports everything from building management to safety and sustainability, streamlining processes for facility owners, managers, and stakeholders.
